

Tree sponsors wanted

The tree population on the TU Dresden campus has been drastically reduced in recent years as a result of many construction measures and for reasons of traffic safety. Unfortunately, replacement plantings have only been carried out to a minor extent.

The TU environmental initiative *tuuwi* wants to remedy this situation with the campaign "Tree sponsorships for the TU Dresden campus" and plant a large number of trees on the campus on a long-term basis. The Rector of TU Dresden, Professor Müller-Steinhagen, has taken over the patronage for the project under the umbrella of the TU Dresden Foundation. Thus, a certificate of donation in the amount of 500 EUR or 1000 EUR can be issued for a tree sponsorship.
